A Viking Map, a Gateway to Discovery

The Viking map, discovered in an ancient library, depicts an uncharted island filled with hidden treasures and enigmatic puzzles. As Sir Cumference and his friends decipher the intricate markings, they're transported to a world of adventure where STEM (Science, Technology, Engineering, and Math) skills are the key to unlocking the island's secrets.

Mapmaking Mastermind: The History of Cartography

Along their journey, Sir Cumference introduces young readers to the fascinating history of cartography. From ancient Babylonian clay tablets to the sophisticated maps of the Age of Exploration, they discover how

humans have used maps to navigate the world, track discoveries, and shape civilizations.

Puzzles and Problem-Solving: STEM in Action

As they traverse the island, Sir Cumference and his companions encounter a series of puzzles that test their STEM knowledge. They must use their math skills to decode riddles, their engineering abilities to build bridges, and their scientific observations to identify hidden paths. Each puzzle they solve brings them closer to the island's treasures.

The Power of Collaboration and Teamwork

Throughout their adventure, Sir Cumference emphasizes the importance of collaboration and teamwork. He teaches young readers that by working together, sharing ideas, and supporting one another, they can overcome any challenge and achieve extraordinary results.

A Journey of STEM and Self-Discovery

Beyond the puzzles and adventures, Sir Cumference and the Viking Map journey teaches children valuable lessons about perseverance, curiosity, and the importance of STEM education. They witness firsthand how STEM skills can empower them to explore the world, solve problems, and create a brighter future.
