Author Graham Robson is one of the world's leading experts on Triumph cars, and he has meticulously researched and written this book to provide a comprehensive and accurate account of the company's history. The book is divided into three parts, covering the early years, the post-war era, and the final years of Triumph production.

The early years of Triumph saw the company produce a range of successful motorcycles and cars, including the Triumph Dolomite and the Triumph TR2. After the Second World War, Triumph focused on producing sports cars, and the TR3, TR4, and TR6 became some of the most iconic British sports cars of all time. In the 1960s and 1970s, Triumph also produced a range of successful saloons and convertibles, including the Triumph 2000, Triumph 1300, and Triumph Stag.

The final years of Triumph production were marked by financial difficulties and a decline in sales. In 1984, the company was sold to British Leyland, and production of Triumph cars ceased in 1985. However, the legacy of Triumph lives on, and the company's cars continue to be cherished by enthusiasts around the world.

Triumph Cars: The Complete Story - New Third Edition is a must-have book for any fan of Triumph cars. This comprehensive and well-written book is the definitive history of one of Britain's most iconic car manufacturers.
